FEATURES & BENEFITS

The DYNOTECH PVC Junction Box is designed to support electrical devices and fixtures while protecting wires and terminals. It serves as the communal meeting spot for electrical wires where they connect before moving in different directions through conduit and other electrical fittings. Every DYNOTECH PVC junction box comes with a PVC cover, zinc-plated screws, and a neoprene gasket that must be used to achieve compliance with applicable building and electrical codes.

- Neoprene gasket with zinc-plated steel screws.
- NEMA Rating for Types 1, 3, 3S, 4, 4X, 5, 6, and 6P.
- Proven durability in demanding applications.
- Non-conductive, non-corrosive, non-rusting.
- Rated for indoor and outdoor use.
- ETL Listed.
