

FLEX TO EMT COMPRESSION UL CONNECTOR

Silver

SKU: 402050

SPECIFICATION	DETAILS
Material	Steel
Certifications	UL Listed
Color	Silver
Available Sizes	1/2" (5x50 pcs) 3/4" (5x50 pcs) 1" (5x20 pcs)
Packaging	Depends on the size.

FEATURES & BENEFITS

The DYNOTECH Flex to EMT Compression UL Connector connects and grounds conduit with these EMT to FMC Compression Couplings. The couplings are corrosion-resistant, easy to install, and meet UL requirements.

- **Transition:** The primary function is to bridge the gap between EMT and FMC.
- **Flexibility:** Allows for bends and turns in the wiring pathway, accommodating for obstructions or complex layouts.
- **Wiring Runs:** Enables the creation of a continuous raceway that combines the rigidity of EMT with the flexibility of FMC.
- **Applications:** Commonly used for lighting fixtures, appliances, and other situations where flexibility is needed in wiring.
- Available in different types, such as set screw, compression, or saddle clamp designs.
- Rugged metallic construction ensures mechanical protection for the raceway.
- Additional sizes available.
